

Connexus Perimeter

Our wall-mounted Connexus Perimeter unit lets you tap into underutilized wall and corner space to offer high-impact training. Connexus works with a wide range of accessories and training modalities including bars, bands, med balls, boxing bags, TRX straps and more. This gives trainers ultimate flexibility to design their own protocols and the ability to build variety into the programming they offer individuals, small groups and classes. Connexus features low, mid and high anchor points that accommodate bodyweight, resistance and flexibility training for a wide range of individuals and ability levels. Enhanced adjustability simplifies set-up and transitions between exercises to keep class and training sessions moving smoothly with little downtime. Plus, the Connexus Expansion kit enables you to build a functional training system perfectly tailored to your programming needs and budget.
